- Node.js
- Gatsby

EDUCATION

Diploma of Information Technology – Holmesglen Tafe (Graduating November 2021)

Certificate IV in Web-Based Technologies – Holmesglen Tafe (November 2020)

About Me

I am a frontend developer who loves all things Javascript. I enjoy building responsive websites with interactive and user centered experiences. I have a passion for learning and picking up new technologies.

Development Experience

- Built a CMS driven modern React/Gatsby website with GraphQL API calls to contentful.
- Built a range of frontend websites using a combination of Javascript, HTML, CSS and React. These websites follow a mobile first approach.
- Built a small-scale full stack website using the MERN stack.
- Experience using GIT with a small team for version control.

Other Skills

- Three years working in retail and hospitality have given me strong communication skills and taught me to always think about how my work will affect the customer.
- Strong team skills developed both during my time working in retail and hospitality as well as working with a team to deliver client projects during my diploma.
- A year long, world cycle touring trip taught me resilience and given me confidence to know that any challenge can be overcome, helping me realize that I am a capable problem solver.
- A lifelong passion for learning, focusing on technology, history and politics.
